

Amy L. Williams

EDUCATION	Massachusetts Institute of Technology , Cambridge, Massachusetts, USA Ph.D., Computer Science February 2010 <ul style="list-style-type: none">• Advisors: Professors David K. Gifford and David E. Housman M.S., Electrical Engineering and Computer Science June 2005 <ul style="list-style-type: none">• Advisor: Professor Michael D. Ernst University of Utah , Salt Lake City, Utah, USA B.S., Computer Science (with Honors) May 2003 <ul style="list-style-type: none">• Advisor: Professor Wilson Hsieh B.S., Mathematics May 2003
AWARDS AND FELLOWSHIPS	Alfred P. Sloan Research Fellowship , 2015 ASHG Trainee Research Semifinalist Award , 2011 Ruth L. Kirschstein National Research Service Award (NRSA) , 2010 NIH post-doctoral fellowship (2010 – 2013) NSF Graduate Research Fellowship , 2003 Pre-doctoral fellowship (2003 – 2006) Dean's List , University of Utah, 1998 – 2002 C.M. Collins Engineering Scholarship , University of Utah, 2002 Early undergraduate admission following high school junior year, 1998
PROFESSIONAL EXPERIENCE	Brigham Young University , Provo, Utah, USA <i>Associate Professor</i> April 2025 to Present Computer Science 23andMe, Inc. , Sunnyvale, California, USA <i>Senior Scientist II</i> January 2022 to November 2024 Population Genetics Research & Development Cornell University , Ithaca, New York, USA <i>Associate Professor</i> July 2020 to December 2022 <i>Nancy and Peter Meinig Family Investigator in Life Sciences</i> Computational Biology <i>Assistant Professor</i> August 2014 to June 2020 <i>Nancy and Peter Meinig Family Investigator in Life Sciences</i> Computational Biology

Columbia University, New York, New York, USA, *and*
Howard Hughes Medical Institute, Chicago, Illinois, USA
Work conducted at Columbia University

Postdoctoral Research Fellow **August 2013 to July 2014**
• Advisor: Professor Molly Przeworski

Harvard Medical School, Boston, Massachusetts, USA

Postdoctoral Research Fellow **October 2009 to July 2013**
• Advisors: Professors David Reich and David Altshuler

Massachusetts Institute of Technology, Cambridge, Massachusetts, USA

Graduate Student and Research Assistant **January 2004 to October 2009**
• Advisors: Professors David K. Gifford and David E. Housman

Teaching Assistant **January 2005 to May 2005**
• 6.170, Spring Semester 2005: Laboratory in Software Engineering
– Undergraduate course in software engineering principles

University of Utah, Salt Lake City, Utah, USA

Undergraduate Research Assistant **May 2002 to May 2003**
• Advisors: Professors Wilson Hsieh and Peter Shirley

GRANT
SUPPORT

NIH/NIGMS R35GM133805 (Role: **PI**)
Scalable methods for the characterization and analysis of families in large genomic datasets.
Award period: 9/1/2019 – 7/31/2024
Total amount: \$1,606,482

Alfred P. Sloan Research Fellowship, Alfred P. Sloan Foundation (Role: **PI**)
Award period: 9/15/2015 – 9/14/2017
Total amount: \$50,000

NIH/NIGMS R01GM102192 (Role: **Subaward PI**; PI: Adam Siepel)
Computational methods for human genomic data integration: demography, selection, and

functional potential.
Award period 9/1/2014 – 8/31/2017
Total amount: \$148,441

CONFERENCE TALKS	“ <i>Envisioning the promise (and potential peril) of joining DNA from many people with giant family trees</i> ” (Invited Speaker)	March 2025
	Family History Technology Workshop	
	“ <i>Reconstructing parent genotypes at genotyping array accuracy using siblings and other relatives</i> ”	July 2024
	Society for Molecular Biology and Evolution	
	“ <i>Estimating relationships by combining DNA from multiple siblings</i> ”	March 2022

OUTREACH

Informing the broader non-scientific community about my research is a passion I spend both time and a small amount of personal money to pursue. I am especially interested in reaching the lay genetic genealogy community, an avid group of family history practitioners. To that end, I have presented at the RootsTech family history conference three times, with recorded videos from some pandemic years available on YouTube. I also built and continue to maintain the website <https://hapi-dna.org/>, which provides user-friendly web-based versions of several tools my lab developed. (Notably I built the web versions of the tools and did not ask trainees to do so.) The website also includes helpful information such as the rates at which various relatives share identity-by-descent (IBD) segments. It is linked to from the International Society of Genetic Genealogy (ISOGG) website and receives an average of roughly 50 views per day.

PROFESSIONAL SERVICE

- Ad hoc reviewer, National Institutes of Health (MRAA) Study Section 2024, 2025
- Reviewer, National Science Foundation (CISE) Panel 2019
- Ad hoc reviewer, National Institutes of Health (BMRD) Study Section 2018
- Reviewer, Intelligent Systems for Molecular Biology (ISMB)/ECCB Conference 2018
- Reviewer, National Heart Lung and Blood Institute (NHLBI) 2016
 - Special Emphasis Panel
- Reviewer, National Human Genome Research Institute (NHGRI) 2015
 - Special Emphasis Panel
- Reviewer, American Society of Human Genetics 65th Annual Meeting 2015
- Reviewer, Intelligent Systems for Molecular Biology (ISMB)/ECCB Conference 2015
- Ad hoc reviewer for manuscripts submitted to the following journals: 2010-Present
 - ◊Guest editor
 - Nature
 - Nature Genetics

UNIVERSITY SERVICE

- Service performed at Brigham Young University:
 - Data Science and Machine Learning Committee 2025-Present
- Service performed at Cornell University:
 - Director of Graduate Studies, Computational Biology 2020-2021
 - Faculty Search Committee, Computational Biology 2019-2021
 - Admissions Committee, Computational Biology and/or 2014-2021

- Computational Biology and Medicine Graduate Fields
- Lead PI overseeing Computational Biology Compute Cluster 2018-2021
 - Advisor to up to 13 undergraduate students majoring in Biometry & Statistics and/or Biological Sciences 2015-Present
 - Advisor to up to 10 freshman Biological Sciences majors 2017-2019
 - Faculty Search Committee, Computational Biology 2018-2019
 - Senator, CALS Faculty Senate 2017-2018
 - Program Committee, Computational Biology and Medicine Graduate Field Tri-Institutional program of Cornell University, Weill Cornell Medical College, and Sloan-Kettering Institute 2016-2017
 - Faculty Search Committee, Biological Statistics & Computational Biology 2015-2016
 - Consulted Life Science Advisory Committee concerning computational biology on campus Oct 2015
 - Faculty Search Committee, Molecular Biology and Genetics Dept. 2014-2015

TEACHING

Algorithm Design and Analysis: CS 312 (two sections, Fall 2025), Brigham Young University. 98 students total in two sections. A study of the design and analysis of algorithms as solutions to problems, including dynamic programming, divide-and-conquer algorithms, etc. Assignments included weekly or bi-weekly Python-based computational projects and twice-weekly homework assignments.

Computational Genetics and Genomics: BTRY 4840/6840, cross-listed as CS 4775 (Fall semester, every year from 2015 to 2020), Cornell University. Up to 57 undergraduate and graduate students. Introduction to computational algorithms for analyzing genetic and genomic data. Assignments include bi-weekly statistical and Python-based computational problem sets and a final project implementing an algorithm from the literature or a new method typically based on the student's research.

Statistical and Computational Genetics: BTRY 7200 (Spring semester, every year from 2016 to 2021), Cornell University. 10 students, primarily graduate. Weekly readings and discussions of recent literature on computational genetics or population genetics.

MENTORING

Postdoctoral associates

Sayantani Basu-Roy, Computational Genomics, Cornell University, 2015-2017.

Doctoral students

Siddharth Avadhanam, Computational Biology, Cornell University, 2018-2023.

Jens Sannerud, Genetics, Genomics, & Development, Cornell University, 2017-2023.

Daniel Seidman, Computational Biology & Medicine, Cornell University, 2017-2022.

Ying Qiao, Computational Biology, Cornell University, 2017-2021.

Melissa Hubisz, Computational Biology, Cornell University, co-chair, 2014-2019.

Monica Ramstetter, Computational Biology, Cornell University, co-chair, 2015-2017.

Doctoral committees

Cole M. Williams, Computational Biology, Brown University, 2021-2025.

Travis Wrightsman, Plant Breeding, Cornell University, 2019-2024.

Runxi Shen, Computational Biology, Cornell University, 2018-2022.

Jonathan Hughes, Ecology & Evolutionary Biology, Cornell University, 2017-2022.

Afrah Shafquat, Computational Biology, Cornell University, 2017-2021.

Konnor La, Computational Biology & Medicine, Cornell University, 2020.

Ariel Chan, Plant Breeding, Cornell University, 2016-2019.

Master's students

Rebekah Daniels, M.S., Computer Science, Brigham Young University, 2025-Present.

Rajesh Bollapragada, M.Eng., Computer Science, Cornell University, 2019.

Ramya Babu, M.S., Computer Science, Cornell University, 2017-2018.

Joshua Cohen, M.Eng., Computer Science, Cornell University, 2016.

Undergraduate researchers

Brandon Monson, B.S., Bioinformatics, Brigham Young University, 2026-Present.

Jason Summers, B.S., Bioinformatics, Brigham Young University, 2025-Present.

Elise Wirthlin, B.S., Computer Science, Brigham Young University, 2025-Present.

Joan Siasoyco, B.S., Computer Science, Brigham Young University, 2025.

Gilyeon Hwang, B.S., Bioinformatics, Brigham Young University, 2025-Present.

Yilei Huang, B.S., Biometry & Statistics, Cornell University, 2020-2021.

Jesse Smith, B.S., Applied Physics, Cornell University, 2019-2020.

Michael Merrill, B.S., Information Science, Cornell University, 2017.

Arjun Biddanda, B.S., Computer Science, Cornell University, 2015.
